What Would You Give.

To be cured of catarrh? If you or your wife have it, have a pair of hood's pillows or seraphina socks. If your symptoms are inflamed eyes, ringworm in the ears, headache, capriosis appetite, and constipation, take hood's sarsaparilla. Fortunately, it is not a question what you will give, but what you will take. If you will take hood's sarsaparilla, the great constitutional remedy, which cures the ills, you may expect to be completely and permanently cured.

The good blood which hood's sarsaparilla makes, readjusting the delicate passes of the nerves, cures sores, and relieves the tissues and ultimately cures all symptoms of catarrh.

To make it appear to the thousands, who think it has no value, that they are not satisfied with my claims, but to the system, simply needs cleaning, is to bring comfort home to their hearts, as a catarrh condition is easily cured by using Syrup of Figs. Manufactured by the California Fig Syrup Co., only, and sold by all druggists.

## SYRUP OF FIGS

### KENTUCKY CROP REPORT.

CONDITIONS OF CROPS AND LIVE STOCK

NOVEMBER 1, 1899

Replies were received this month from 136 correspondents representing 102 counties.

WHEAT.

The close of October saw practically the entire wheat crop seeded. The contemplated acreage is estimated at 100,000 with the acreage of 1898, 95 per cent of which was seeded prior to November 1. This is in striking contrast with the same date of 1898, when fully 30 per cent of the acreage remained to be sown.

The western section reports the increase the same as last year, the increase being in the central section. The southeastern section, where comparatively little wheat is grown, is not included in the estimate of acreage and condition of the wheat crop.

A considerable number of counties show a substantial increase in acreage and a few of these report it the largest in the history of the county. This is offset by reports from counties where the drought prevented the sowing of any but the old and corn lands, by reason of which the acreage is materially reduced.

The conditioning comes with average yield, 97. For the past three years the condition on November 1 has been as follows: 1898, 95; 1897, 62; 1896, 96. In the western section the condition is 97, while for the central section it is 99.

The soil was in most excellent condition for sowing and generally there was sufficient moisture to permit rapid and perfect germination. As a result the stand is good and the plant is vigorous.

In a number of counties local showers from time to time have made the condition phenomenally high. In the central section, Bourbon county reports the condition 140 compared with average years; Clark, 120; Scott, 115; Lincoln, 120, and Madison, 125.

In the western section, Hickman reports a condition of 120 and Larue a condition of 125.

Against these very favorable reports, however, are reports from counties where the drought was long and severe and where the plant had difficulty in sustaining itself against the combined influences of heat and lack of moisture. In such counties the condition is correspondingly low. Some injury also has resulted from insects. In Mercer county cut worms have caused considerable damage, and in Warren the crop is infested with "fly," removing to some extent being necessary.

On the whole, however, farmers have every reason to be encouraged by the prospects. The cultivation was probably never better, and now that the drought is broken, we may expect an improvement on even the present flat-topping outlook.

#### PASTURES AND LIVE STOCK.

Pastures have improved slightly during the month. The condition Nov. 1 averages 69 as against 65 in October. Feeding has been necessary, and where neglected, stock cattle especially, are reduced in size. Farmers have curtailed the number of stock on hand so as to better enable them to care for the remainder. Few cattle are being fed for market, and on account of the absence of the usual grazing and the scarcity of stock water the condition of these is but 85 compared with average years.

Hogs have been marketed freely, and a small portion of the number fed remains unsold. The condition, compared with average years, is 90. Thirty two correspondents report hog cholera and 97 report none in county.

The weather has been favorable and good progress has been made in harvesting the corn crop. The yield has been disappointing, falling far below expectations. More than the usual attention has been given to saving the fodder crop, and the supply of roughage will seek by every means in its power to maintain its supremacy.

Democrats must be up and doing. They must wage an unceasing war upon their enemies. In no better and more effective way can this be done than by the circulation of good, sound Democratic newspapers. The publisher of The Chicago Dispatch, will send a copy of The Chicago Dispatch from now until January 1, 1901, for 50 cents. You are not already taking this great political weekly, send in ten cents at once. You should induce all your friends to join with you. By a little effort you can easily raise a club of ten or twenty subscribers.

The Chicago Dispatch is endorsed by William Jennings Bryan and other Democratic leaders.

There are women everywhere who suffer almost constantly because they cannot bring themselves to tell all about their ills to a physician.

Such women can surely explain their symptoms and their suffering by letter to Mrs. Pinkham at Lynn, Mass., for the confidence reposed in her has never been violated. Over a million women have been helped by her advice and medicine.

Mrs. Pinkham in attending to her vast correspondence is assisted by women only.

If you are ill, don't delay. Her reply will cost you nothing and will be a practical help as it was to Miss Ella E.
